Measures:

Mechanisms:

A

Standard Technique

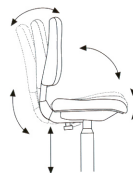

Height of seat back and depth of seat are mechanically adjustable.

B

Permanent Contact Technique

The height adjustable seat back follows the movement of the upper body, remaining in permanent contact with the person's back. It can be locked into the required reclining position.

C

Synchronised Technique

Seat and seat back work in synchronisation following the movements of the person seated and maintaining the correct angle. They can be locked in any position. The seat back is height adjustable. The flexibility of synchronisation is adjustable.
